

Going Caching 2023

Installation of Geocaching Stations along the Mt. Berry Trail

In preparation for the installation of geocaches along the Mt. Berry Trail (beginning at the parking area behind the U.S. Post Office and continuing to the trail end at Big Dry Creek), we have marked 13 locations which require 4X4 posts (Locations #2 through #14 on the attached overview map).

- Location #1 is in the parking area and does not require a 4X4 post. This will be a handicap-assessable geocache on the outside of the parking area fence.
- Each location is numbered and marked with a small orange flag stake and marking paint.
- GPS coordinates for each location are provided below (along with the attached GPX file for use with a GPS receiver if required).
- All locations are on the Oostanaula River side of the trail and, except for #6 and #12, are within a few feet of the pavement. Location #6 is positioned near the seating area of the River Overlook. Location #12 is approximately 20 feet from the trail in a scenic open area closer to the river.
- We request that the 4X4 posts be positioned as close as possible to the marks and set in cement with approximately 5' remaining above ground so that we can trim the tops to suitable height during the mounting of the geocaches on the posts.
